1.1 Project Overview

Creating a brand name, brand email, and brand logo involves multiple steps, and Canva is a helpful tool for designing your logo, but it does not provide email services or suggest brand names. Here's how you can approach each of these elements:

Create a Brand Name :

Brainstorm a unique and memorable brand name that aligns with your business or project. Consider the purpose, target audience, and values of your brand.

Ensure the chosen name is not already in use and that a suitable domain (for a website) is available for registration.

Design a Brand Logo with Canva:

Open Canva (web or mobile app).

Click on "Create a design" and select "Custom dimensions" if needed. You can choose standard dimensions for logos or specify your custom size.

Once the canvas is ready, use Canva's tools to create your logo. You can start from scratch or use one of Canva's logo templates for inspiration.

Customize your logo by adding text, shapes, icons, and images.

Adjust colors, fonts, and sizes to match your brand's identity.

Download your logo in a suitable format (e.g., PNG or SVG) to use on your website, social media, and marketing materials.
